

September 2017

Dear Parents

**MATHS : NUMBER FACT SHEETS**

Please find a recommended Number Facts Sheet, relevant to your child's year group, that the children should be able to remember and recall quickly. There are also images and mathematical models to support the learning of these facts.

Helping your child learn these facts will greatly improve their fluency in number and will allow them to tackle problem solving and reasoning more easily.

The number facts are built upon each year. We have, therefore, put all the sheets for the year groups onto the website so that you can access previous year groups' fact sheets. This is particularly relevant for children higher up in the school.

Homework may be given throughout the year that asks the children to learn and apply these facts in a range of contexts.

If you have any further questions regarding the number facts or how you can support your child's learning them then please contact your child's class teacher

Yours sincerely

Tony Hughes
