

## *Roll a Fact*

A game for two players, each with a different coloured pen.

You will need two dice (0 – 9), two different coloured pens and a blank multiplication fact chart.

Player one rolls the two dice. The numbers shown on the two dice indicate the factors. If a double comes up the player may only record the product in one place on the grid. Other facts may be recorded in one of two places. For example, if a 5 and 4 turn up, the player may choose to multiply 5 by 4 and enter 20 in the appropriate spot, or multiply 4 by 5 and enter twenty in the appropriate place.

Play continues until one player completes three facts in a row, either vertically, horizontally or diagonally. The game may be made longer by changing it to four facts in a row.
