# Help your child enjoy maths!

Dear Parents

Our school website now features a link to a website called "Interactive Resources". This is full of fun activities which challenge the children's mathematical thinking and can reinforce basic skills. The children use them at school but can also use them at home. There are activities suitable for Year R through to Year 6.

To access these resources please follow these instructions:

1. Go to the school website [www.swanmoreprimary.org.uk](http://www.swanmoreprimary.org.uk)
2. Click on the children's pages.
3. Open your child's year group.
4. Click on the maths link at the top of the page.
5. Click on pupil login.
6. Enter the user name **Swanmore** and password **daisy1** and login.
7. Go to My Favourites (left hand side of page) and select your child's year group.
8. There is a list of activities, selected by your child's teacher, for the children to use.

In our experience the children quickly develop favourites and thoroughly enjoy using the activities.

Yours sincerely

Rowley Bucknill  
Deputy Headteacher
